AngularJS and Kendo UI front end developer

Looking for an experienced front end developer for a 3-6 month project. You will work with a team of international experts for this project. This contract includes multiple sub-projects. Must be experienced with Javascript, AngularJS, Bootstrap, and Kendo UI. Please note we are creating a Rich Internet Application, not a website/blog/etc. We have specifications available for applicants to review upon request.

Required Experience

- Experience creating localized (many languages) interfaces with AngularJS and Kendo is preferred
-
- UI, UX, Interactivity design experience a huge plus
- Graphic design experience a plus but not required for this project
- Experience in making architectural recommendations (wireframes will be provided)
- Prior experience with Scrum is a plus
- JIRA knowledge is a plus
- Prior experience with continuous integration is a plus
- Experience with GIT source control

The UX goal of our project is to take a highly technical and difficult topic and translate that into a beautiful, intuitive, and functional interface.

To be a best fit for this project you need:

- Ability to communicate clearly
- Dedication to meet project deadlines in a timely manner
- Knowledge of smart commits for our ticketing system
- Write I am a human on top of your proposal
- Attention to detail
- Willingness to sign an NDA

If you are interested in the project, please reply with your prior experience and Resume.
